**Rectangular Inductive Proximity Sensors** (□ 8/12/50 mm)

# PS Series (DC 3-wire)

**INSTRUCTION MANUAL** 

TCD220056AA

**Autonics** 

Thank you for choosing our Autonics product.

Read and understand the instruction manual and manual thoroughly before using the product.

For your safety, read and follow the below safety considerations before using. For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.

Keep this instruction manual in a place where you can find easily.

The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice.

Follow Autonics website for the latest information.

#### Safety Considerations

- Observe all 'Safety Considerations' for safe and proper operation to avoid hazards.
- A symbol indicates caution due to special circumstances in which hazards may occur.

▲ Warning Failure to follow instructions may result in serious injury or death.

- 01. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss. (e.g. nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.) Failure to follow this instruction may result in personal injury, economic loss or
- 02. Do not use the unit in the place where flammable/explosive/corrosive gas, high humidity, direct sunlight, radiant heat, vibration, impact, or salinity
- re to follow this instruction may result in explosion or fire
- 03. Do not disassemble or modify the unit. ailure to follow this instruction may result in fire
- 04. Do not connect, repair, or inspect the unit while connected to a power source.
- Failure to follow this instruction may result in fire.

05. Check 'Connections' before wiring. Failure to follow this instruction may result in fire.

▲ Caution Failure to follow instructions may result in injury or product damage.

- 01. Use the unit within the rated specifications.
- ilure to follow this instruction may result in fire or product damage
- 02. Use a dry cloth to clean the unit, and do not use water or organic solvent.

#### Cautions during Use

- Follow instructions in 'Cautions during Use'.
- Otherwise, it may cause unexpected accidents
- 12 24 VDC= power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- · Use the product, after 0.8 sec of supplying power.
- Wire as short as possible and keep away from high voltage lines or power lines, to prevent surge and inductive noise.
- Do not use near the equipment which generates strong magnetic force or high frequency noise (transceiver, etc.).
- In case installing the product near the equipment which generates strong surge (motor, welding machine, etc.), use diode or varistor to remove surge.
- · This unit may be used in the following environments
- Indoors (in the environment condition rated in 'Specifications')
- Altitude max. 2,000 m - Pollution Degree 2
- Installation Category II

# **Cautions for Installation**

- Install the unit correctly with the usage environment, location, and the designated
- Do NOT impacts with a hard object or excessive bending of the wire lead-out. It may cause damage the water resistance
- Do NOT pull the Ø 2.5 mm cable with a tensile strength of 20 N, the Ø 4 mm cable with a tensile strength of 30 N or over and the Ø 5 mm cable with a tensile strength of 50 N or over. It may result in fire due to the broken wire.
- When extending wire, use AWG 22 cable or over within 200 m.
  Refer to the table below for the screw tightening torque when
- when mounting the bracket.

•	Refer to the table below for the screw lightening torque					
	Sensing side length	8 mm	12 mm	50 mm		
	Tightening torque	0.7 N m	0.49 N m	0 98 N m

# **Setting Distance Formula**

Detecting distance can be changed by the shape, size or material of the

For stable sensing, intall the unit within the 70 % of sensing distance.

# Setting distance (Sa)

= Sensing distance (Sn) × 70 %

## Mutual-interference & Influence by Surrounding Metals

### ■ Mutual-interference

When plural proximity sensors are mounted in a close row, malfunction of sensor may be caused due to mutual interference.

Therefore, be sure to provide a minimum distance between the two sensors, as below table.

[Face to Face]

· Upper side type

## ■ Influence by surrounding metals

When sensors are mounted on metallic panel, it must be prevented sensors from being affected by any metallic object except target. Therefore, be sure to provide a minimum distance as below chart
